

SPACEX INTERIOR DESIGNING

HOME INTERIORS FROM START TO
FINISH.

Our Project mainly contains three parts:

Sign Up

Log In

Main Website Page

Sign Up

The sign-up page contains 4 fields:

- **Username**
- **Email**
- **Password**
- **Confirm Password**

Username field will accept fields only up-to 15 characters.

Password field will accept only up-to 25 characters.

All fields are to be filled in order to proceed further. This is ensured by java Script Validation.

All data is stored in a separate database. The validations applied includes checking of uniqueness of username and email. If these fields are not unique an alert will be shown and page will be refreshed.

A validation to match the password and confirm password is also given which will show an alert if not true.

If the passwords match and all fields are correctly filled the user will be directed to login page to further proceed with the website.

Log In

Log-in page contains two fields:

- Username
- Password

Both fields are to be filled in order to proceed further. This is ensured by java Script Validation.

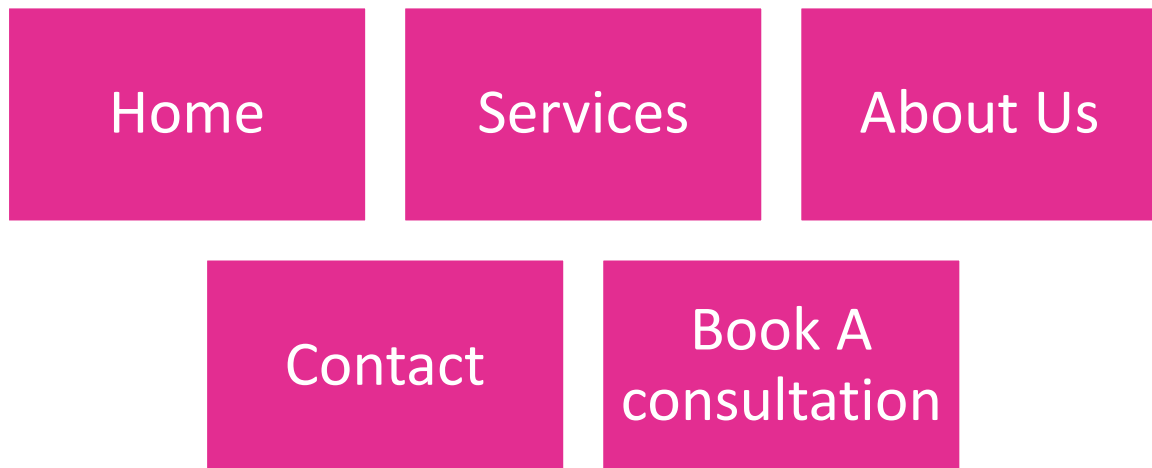

If the user doesn't exist an alert will be shown and page will be refreshed.

If the user wants to sign up first a sign-up link is provided on the page itself.

If the user enters correct username and pass-word he/she will be directed to the main website.

Main Website Page

The page contains five divisions:

The navigation bar on the top ensures to take the user to their desired location.

Home Page contains the basic introduction of the website.

Services gives a glimpse of our work.

About Us tells us about the founders and the motivation behind the project.

Contact us is the medium to communicate for services.

Book an appointment will direct to an appointment form where details such as address and expected date for visit needs to be filled.
